

RELEASE NOTES

Date: 9-Oct-24

Subject: Software changes, updates, bug fixes, etc.

Software: Fortanix Filesystem Encryption - Windows

Version: 1.0.62

OVERVIEW

This document provides an overview of improvements and bug fixes in the Fortanix Filesystem Encryption (FSE)-Windows 1.0.62 release.

IMPROVEMENTS

- Fortanix now supports automatic collection of memory dumps during error for `fortanix-dsm-fseagent.exe` to help users save and analyze data when a crash occurs (**JIRA: FSE-131**).

BUG FIXES

- Fixed an issue where multiple threads got stuck accessing the same `unordered_map` that caused high CPU usage (**JIRA: FSE-135**).
- Fixed an issue where the Automount and Autoshare scripts ran separately so the share started before the mount was finished (**JIRA: FSE-136**).

For more information, refer to [Filesystem Encryption for Windows Using Fortanix Data Security Manager - Client Configuration](#).

INSTALLATION

To install the latest Filesystem Encryption package for Windows, [click here](#).

BEST PRACTICES

Because our quality assurance process includes continuous security testing, Fortanix recommends keeping all Fortanix products updated with the latest releases as soon as possible. As an overall strategy to reduce risk exposure, customers are encouraged to follow the best practices, which include:

- Always keep the product version up to date.
- Only issue accounts to trusted administrators.
- Utilize strong passwords.
