RELEASE NOTES

Date: 22-Jul-24

Subject: Software changes, updates, bug fixes, etc.

Software: Fortanix Key Insight
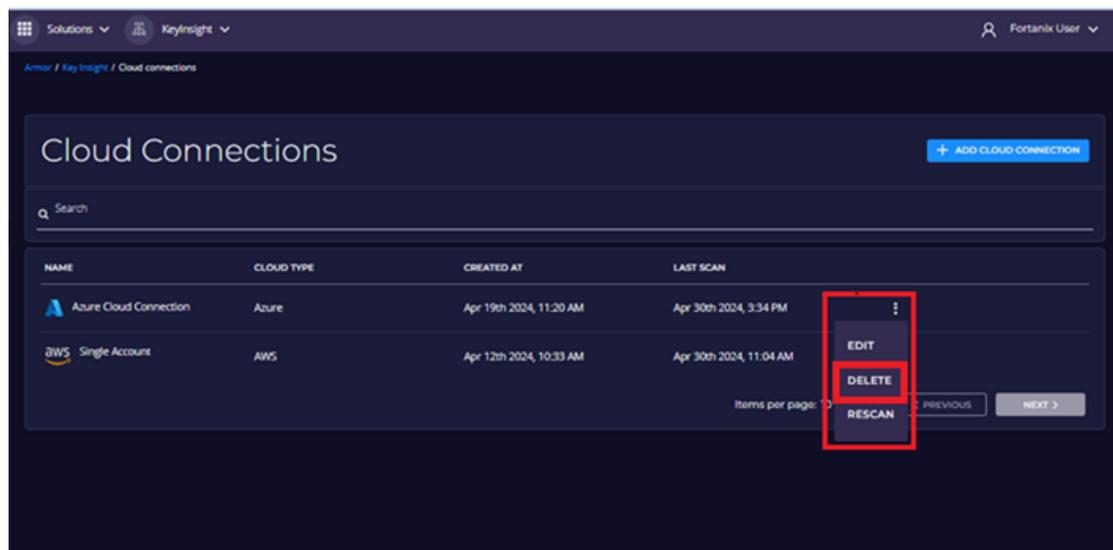

Version: 3.6

OVERVIEW

This document provides an overview of new features, general improvements, and resolved issues in the Fortanix Key Insight 3.6 release.

NEW FEATURES

- **Fortanix Key Insight now supports the deletion of cloud connections and their associated details (JIRA: KI-861).**

  When you delete a cloud connection, any related scanned data and assessment data will also be deleted.
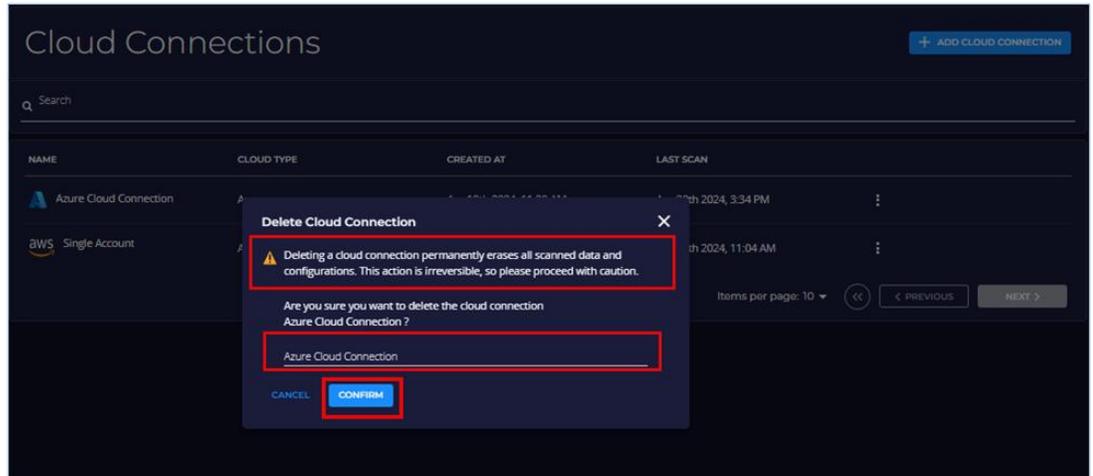

RELEASE NOTES

Date: 22-Jul-24

Subject: Software changes, updates, bug fixes, etc.
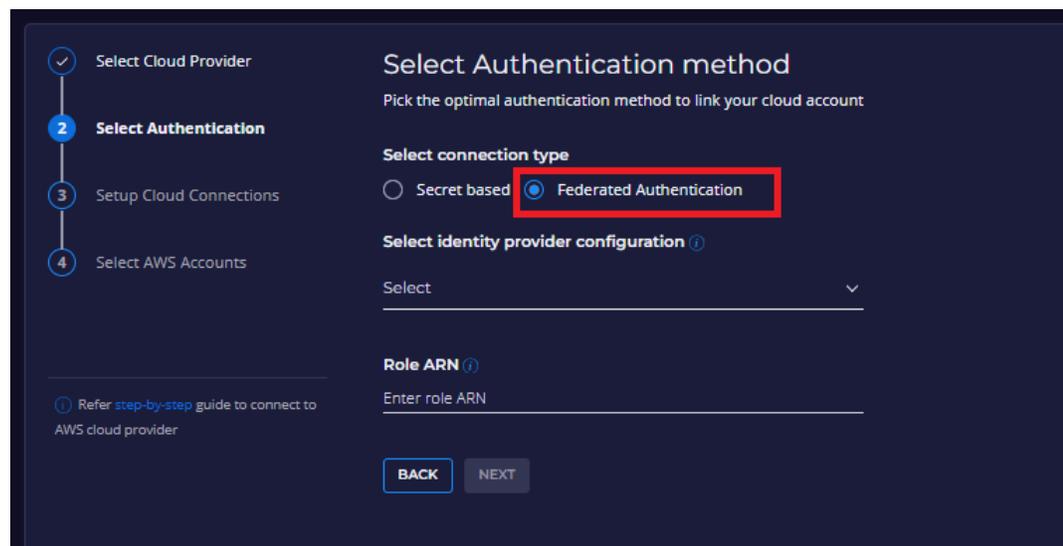

Software: Fortanix Key Insight

Version: 3.6

For more details, refer to the KI – Getting Started Guide.

- **Customers can now federate an AWS or Azure cloud account with other identity providers using the new Federated Authentication feature (JIRA: KI-865).**

  Using this feature,

  o Now, you have the option to set up **Federated Authentication** as an additional authentication method during AWS and Azure cloud connection setup.

- Fixed an issue where users could edit and save an AWS cloud connection with an invalid AWS access key **(JIRA: KI-898)**.

BEST PRACTICES

Because our quality assurance process includes continuous security testing, Fortanix recommends keeping all Fortanix products updated with the latest releases as soon as possible. As an overall strategy to reduce risk exposure, customers are encouraged to follow best practices, which include:

- Always keep the product version up to date.
- Only issue accounts to trusted administrators.
- Utilize strong passwords.
- Monitor logs.
